	Communist Organization, "The Pioneers". The program in which the Pioneer movement was emphasized at this school depended on individual professors. In other words, the professors in each classroom were expected to recruit and recommend Czechoslovakian youth to the Pioneer organization.	S. C.
h	the	25 <b>X</b> 1
b.	approximate age acceptable to the Pioneer organization was about 18.  Those who were not members of the Pioneers were obliged to work	25X1
	for the government whenever the need existed members worked only on week ends and during the summer. Some (non-Pio-	25X1
	neers) were taken from the school during harvests, during the drives to pick Colorado bugs from potato plants, etc.	25X1
	intense emphasis on teaching the students to fear the West, particularly the US. In both regions taught that the US Air Fonce was engaged in bacteriological warfare and that it had been accused of dropping bacteria into the rural areas in order to poison Czechoslovakian crops. Around Prague, particularly in the rural areas areas as well as in eastern Czechoslovakia, youngsters were assigned the mission of collecting potato bugs which the propagandists attributed to US bacteriological warfare.	25 <b>X</b> 1
Dis	seases and Immunization	
8.	disease which was prevalent in various sectors of Gzechoslovakia from 1948 to 1952  the Gzechoslovakia for this disease (which resulted in a crippling of the lower limbs) was that a virus had been introduced by Bulgarian and Korean children residing in Gzechoslovakia. The government hospitals treated Oberna with paniefilin and streptomycin. Affected persons were sent to mineral springs and spas for mud baths and heat treatments.	25X1
<b>b.</b>	Tuberculosis was very common throughout the entire country. The population, by and large, realized that this affliction was due to undernourishment. constant complaining about the ration system which did not provide sufficient staple foods such as butter, eggs, milk or meat.	25 <b>X</b> 1
C.b.	Immunization in the schools was confined to innoculations and vaccinations for smallpox and typhoid fever.

	d.	With reference to inoculation for typhoid fever, such inoculation took place after an epidemic broke out.	
	e.	in 1952 the secondary schools in Prague were using some form of vaccine to inoculate for tuberculosis.	25 <b>X</b> 1
<b>4.</b>	Air	Reid Drills and Alexander and	
	a.	All secondary schools have air raid drills. In eastern Czechoślovakia, as well as in Prague, students were drilled in order to determine how rapidly they could evacuate the school buildings and disperse in the	The state of the s
		school enclosures. in 1953 the students of Prague	25X1
		followed this procedure.	25 <b>X</b> 1
		the air raid alarm consisted of a large school bell which was used to alart the students. The alarm was never sounded at undetermined periods, but followed a prearranged briefing during which the students	25 <b>X</b> 1
	, [	were informed one-half hour prior to the alarm.  There were hone in eastern Czechoslovakia.	25X1 25X1
		none in eastern czecnostovakia.	ILLEGIE
5•	Rad	ios and Broadcasts	ILLEGIE
	a.,	Radio sets were available to most families but unable to listen to anything but local programs or Moscow. It was forbidden to listen to	25X1
		foreign broadcasts. At moments	25X1
		hear portions of Western programs but due to constant interference	25X1
		and jamming, unable to understand any substantial portion that was broadcasted.	25 <b>X</b> 1
	b.		
, <b>**</b>	C¥	In early 1953 another source of interference with radio programs was the electrical current. The supply of electricity, according to governmental explanation, was insufficient and as a consequence, for periods ranging from two to four hours, current was cut off.	25X1
		no determined period of the day or night was set aside by the admin-	25X1
~		istration for the conservation of electrical energy. In other words, electrical energy was cut off without warning at any time of the day or night. Whether or not the government intended it, this prevented	Z3 <b>X</b> I
		attempting to listen to programs	25 <b>X</b> 1
6.	Lab		

a. From the fall of 1952 until the middle of March 1953 there appeared to be considerable unemployment in Gzechoslovakia, particularly in Prague. The newspapers were filled with ads by people desirous of employment. The laboring element most affected was that segment which did not have technical or scientific training. Technical and skilled laborers were always employed, but those who were either semi-skilled or non-skilled had a difficult time.
